PROFILE

Results-driven Computer Science graduate with hands-on experience in Python, REST APIs, SQL, and HTML, and full-stack development on the Odoo framework (ERP system) across versions 14–19. Proven track record of building and customizing Odoo modules across HRMS, Sales, Inventory, Purchase, Accounting, Manufacturing, and Point of Sale, including models, XML views (form, tree, list), QWeb reports, security rules, and automated workflows. Complements professional work with independent practice projects that combine ERP concepts with Django, including an HRMS leave portal, e-commerce websites, and a gym management system built using Django and Python. Proficient in Python OOP, NumPy, Pandas, and JavaScript. Adept at delivering end-to-end, full-stack ERP solutions aligned with business workflows.

WORK EXPERIENCE

Junior Software Engineer – Odoo Developer

APRIL 2026 – JUNE 2026

Numdesk

- Customizing HRMS modules including Employees, Attendance, Payroll, and Leave Management.
- Implementing time-off logic, approval flows, and automated leave accrual policies.
- Building and customizing Sales, Purchase, Accounting, and Manufacturing modules on Odoo v14, v18, and v19.
- Built a custom Odoo module from scratch with required business logic and REST API integration.
- Designed and generated multiple barcode reports (QWeb) for product and inventory tracking.
- Generating reports for Sale, Purchase, and Manufacturing using QWeb and Excel output.
- Applying HRMS business logic and integrating Odoo modules with custom workflows.

Associate Software Engineer – Odoo Developer

OCT 2024 – MAR 2026

Trionex Private Limited

- Learned Odoo v16, v17, v18, and v19 architecture, module structure, and development lifecycle, then progressed to delivering end-to-end Odoo customizations for multiple client projects.
- Designed and shipped custom modules across Sales, Purchase, Inventory, Accounting, Time Off, Manufacturing, and Point of Sale, aligning solutions with business workflows.
- Developed models, views (XML: form, tree, list), menus, actions, security/access rules, and automated workflows.
- Implemented Many2one, One2many, and Many2many relational fields, and integrated REST APIs to connect Odoo with external systems.
- Created QWeb PDF and Excel reports, including multiple barcode reports for product and inventory tracking.
- Implemented Odoo reports, wizards, server actions, and scheduled jobs to streamline operations and improve user experience.
- Implemented backend business logic for client-specific requirements, and optimized ORM queries and batch processes to improve performance.
- Performed functional testing, debugging, code reviews, and documentation to ensure stability and usability.

Python Developer Intern

JUN 2024 – SEP 2024

Trionex Private Limited

- Built a strong foundation in object-oriented programming (OOP), including classes, instances, and encapsulation.
- Developed file handling solutions: reading, writing, and updating CSV, text, and JSON files.
- Used Python modules including NumPy and Pandas for data manipulation, analysis, and assignments.

- Collaborated with senior team members on assigned Python tasks, incorporated feedback, and improved code quality and readability.

PERSONAL PROJECTS

HRMS Leave Portal — *Django, Python*

- Built a full-stack leave management portal with employee login, leave request submission, and multi-level approval workflows.
- Implemented automated leave balance and accrual tracking, modeled on real-world ERP HR processes.

E-Commerce Websites — *Django, Python*

- Built three independent full-stack e-commerce websites for different brands, each with a product catalog, search/filtering, and shopping cart.
- Implemented checkout and order management, plus an admin panel for inventory and order tracking, for each site.

Gym Management System — *Django, Python*

- Built a gym management portal covering member registration, subscription/membership plans, and attendance tracking.
- Added an admin dashboard for managing memberships, payments, and day-to-day gym operations.

EDUCATION

Bachelor of Computer Science

University of Lahore

2022 - 2026

SKILLS

Languages & Frameworks: Python, C++, JavaScript, XML, HTML, SQL/PostgreSQL, Django

Odoo Development (ERP): Odoo (v14-19), QWeb Reports, Odoo ORM, Views Customization, Security Rules

Data & Tools: REST APIs, NumPy, Pandas, Data Structures & Algorithms (DSA), AWS

LANGUAGES

English, Urdu
